ABOUT US

Standard Integrated Solutions Company (SISCO)

- ▶ **Born** 2015, with the concept of First for Service-Service First.
- ▶ **SISCO** has very high experience in water treatment field; it is one of the few companies in this field which closely follows the last technologies and continuously developing its products.
- ▶ **Our design philosophy** is based on utilization of appropriate and up to date technology, ease of operation and cost deficiency.
- ▶ **In addition SISCO** is able to provide operation and maintenance services for water treatment and eluent treatment plants. Our teams include design engineers, project managers, installation teams, field service technicians and equipment operators.

WHAT WE OFFER ?

- Water Treatment Chemicals
- Water Treatment Systems
- Reverse Osmosis (RO) Plants
- Ultraviolet Systems (UV)
- Water Treatment Products
- Swimming Pool Products

WATER TREATMENT CHEMICALS

Our formulated SISCO-Series chemicals are well established and have been a well-known name in the market for a number of years.

We support our products with our knowledgeable service teams who are available to visit your facility, analyze your water and recommend a dedicated treatment and service program to protect your equipment, reduce costs and increase efficiency.

► Steam & Hot Water Boilers Chemicals

- Corrosion Inhibitor
- Scale Inhibitor
- Alkalinity Booster
- Condensate Treatment
- Inhibited Cleaners
- Tablets Salt for Softener Units

► Cooling Water Systems Chemicals

- Scale & Corrosion Inhibitor
- Biocides (Oxidizing & non-Oxidizing)
- Inhibited Cleaners
- Legionella Control Tablets

► Domestic Water Chemicals

- Corrosion Inhibitor

► Reverse Osmosis (RO) Chemicals

- Antiscalent
- Sodium Hypochlorite (Chlorine 12%)
- Sodium Metabisulphite (SMBS)
- Membrane Cleaners

► Waste Water Treatment Chemicals

- Coagulant
- Flocculent
- PH Controller

WATER TREATMENT SYSTEMS

► Water Treatment Units

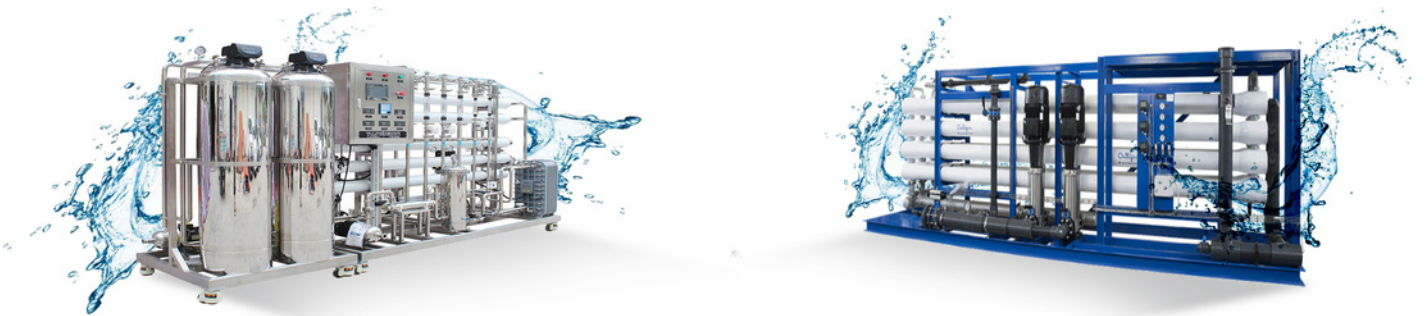

SISCO Design and Supply all water treatment systems including :

- Sand & Multi-media Filter
- Carbon Filter
- Iron Removal Filter
- Softener Units
- De-ionizer & Mixed Bed Units

► Reverse Osmosis Desalination (R.O) Plants

Whether you need an RO system to treat sea water, brackish well water or to supply ultra-pure water for industrial use. SISCO can design and supply the complete system including filters, chemical dosing and RO technology using high quality components.

► Ultraviolet Units (UV)

UV sterilization is the most ecological way for treating water where no harmful chemicals are needed. It is capable to make 99.99% reduction of bacteria, Virus, and Protozoa cysts, Therefore, the UV equipment having a wide applications in the various industries likewise pharmaceutical, Cosmetic, food& beverage, and chemicals in addition to its important applications in the field of sanitary and hospitals.

WATER TREATMENT PRODUCTS

► Water Pumps

- Booster Pumps
- High pressure Pumps
- Submersible Pumps

► Chemical Dosing Systems

- Dosing pumps
- Automatic Dosing Systems
- Dosing Tanks

► Pressure Vessels

- FRP Pressure Vessels
- Steel Pressure Vessels
- Distributors of Pressure Vessels

► Filtration Media

- Gravel & Sand
- Activated Carbon
- Iron Removal Media (Birm, Manganese Green Sand)
- Ion Exchange Resin

WATER TREATMENT PRODUCTS

► Control Valves

- Manual Control Valves
- Automatic Control Valves

► Cartridge Filter

- Stainless & FRP Housing
- String Wound Filter Cartridge
- Melt- Blown Filter Cartridge

► RO. Spare Parts

- RO Pressure Vessel (4.0 Inch & 8.0 Inch)
- RO Membranes (4.0 Inch & 8.0 Inch)
- Flow Meters , Pressure Gauge & Solenoid Valve

► Water Analysis Instruments

- PH , TDS / Cond. Meter
- Turbidity Meter
- Hardness Test Kit

SWIMMING POOL PRODUCTS

SISCO offers a wide range of products for the control and conduction of water, as well as pumps, filters, accessories for cleaning, as well as chemical products for disinfection and water maintenance .

► Pool Treatment Chemicals

- TCCA 90%(Trichloroisocyanuric Acid) Powder- Granular- Tablets
- Calcium Hypochlorite 65 -70%
- Algaecide
- Flocculent
- PH (-) / PH (+)
