

## **SW-CT800**

### **Condensate Treatment**

#### **Description**

*SW-CT800 is a neutralizing amine derivatives based. It is designed to adjust pH of the condensate systems; it has a very high capability for absorbing CO<sub>2</sub>. It has exceptionally good thermal stability, low toxicity and it is completely water soluble*

.

#### **Application**

**SW-CT800** can be dosed with usual feeding equipment, either into the boiler feed water or directly into the boiler drum or steam line. The dose required depends on:

- The condensate recovery
- Existing amount of carbon dioxide in steam
- pH value of condensate

#### **Physical Properties**

<b>Appearance:</b>	Fluorescent greenish liquid
<b>Specific Gravity:</b>	1± 0.02
<b>pH:</b>	11-12
<b>Flash point:</b>	Non
<b>Odor:</b>	Typical amines
<b>Solubility:</b>	completely soluble

#### **Safety and Handling**

- The relevant safety precautions for handling this product should be taken.
- Avoid contacting skin, eyes, mucous membrane and open wounds.
- Wear rubber gloves and goggles. In case of an accidental contact, flush thoroughly with plenty of water

#### **Storage**

- Store in cool, dry and well-ventilated area.
- Keep containers closed all time.

#### **Packaging**

**SW-CT800** is available in 25 kg poly drums.
