With the development taking place in the Saudi, comes the raising need for a leading water treatment equipment supplier. **EQPT** is specialized in providing a cutting-edge equipment and state of the art Water Treatment machinery. With a talented dedicated team of professionals to venture into the market and cater the growing demand for high-quality equipment solution.

While maintaining a strong focus on customer satisfaction, reliability, and innovation. We have parnered up with the world leading brands in the fields of Water Treatment solutions to enhance efficiency, sustainability, and overall performance.

A photograph of large, yellow, curved pipes at a water treatment facility, set against a clear blue sky. The pipes are arranged in a series of curves, creating a strong sense of depth and scale. A large white circle is positioned in the upper left, and a blue circle is in the lower right, both containing text.

Welcome to **EQPT**

Founded with a clear vision and a passion for excellence, EQPT has assembled a team of highly talented professionals who are committed to making a lasting impact and venturing into the market and cater the growing demand. Our team brings together a wealth of expertise and experience in the water treatment industry, ensuring that we deliver the most innovative and efficient solutions to our valued customers.

Our dedication to quality extends beyond our products. We are committed to providing exceptional customer service and support at every step of the way. We believe in building long-term relationships with our clients, understanding their unique needs, and delivering tailored solutions that exceed their expectations. EQPT is here to provide you with the finest water solution equipment available in the market.

Mission

To lead the Saudi Arabian market in delivering cutting-edge water treatment equipment by fostering strategic partnerships with world-renowned brands.

We are committed to building enduring relationships with clients and partners by consistently offering innovative, sustainable, and tailored solutions.

Through continuous investment in our team, technologies, and customer service excellence, we aim to enhance operational efficiency and deliver long-term value to our stakeholders.

Vision

To be the premier provider of advanced water treatment solutions in Saudi Arabia, recognized for setting industry standards in innovation, quality, and reliability. We aspire to drive progress in water management by leveraging global expertise and cutting-edge technology, contributing to a sustainable future while being the partner of choice for all water treatment needs.

Why EQPT

Extensive Expertise

Our team comprises highly skilled professionals with extensive knowledge and experience in the water treatment industry. We understand the unique challenges and requirements of the Saudi Arabian market and can provide expert guidance and solutions.

Cutting-Edge Technology

We stay at the forefront of technological advancements in the industry. By working with renowned manufacturers, we offer state-of-the-art equipment that incorporates the latest innovations, ensuring efficient and effective water treatment solutions.

Tailored Solutions

We understand that each client has unique requirements. We take a personalized approach, working closely with our clients to understand their specific needs and delivering customized solutions that address their challenges effectively.

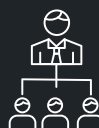

Technical Support

We understand that each client has unique requirements. We take a personalized approach, working closely with our clients to understand their specific needs and delivering customized solutions that address their challenges effectively.

High-Quality Products

We have partnered with the world's leading manufacturers of water treatment, water filtration, and water solution equipment. Our products are known for their exceptional quality, performance, and durability, ensuring that clients receive reliable and long-lasting solutions.

Exclusive Distribution Rights

As the authorized distributor for top manufacturers in Saudi Arabia, we have exclusive access to their products. Clients benefit from our direct partnerships, guaranteeing genuine products and comprehensive support.

Exceptional Customer Service

Client satisfaction is our top priority. We are committed to providing exceptional customer service throughout the entire journey with us.

Goals

Customer Satisfaction

Making customer satisfaction a top priority by consistently delivering high-quality products, exceptional service, and tailored solutions that exceed their expectations. Building long-term relationships with our clients based on trust and reliability.

Market Leadership

Establishing EQPT Solution as a recognized leader in the water solution equipment industry in Saudi Arabia. This includes gaining a significant market share, expanding our customer base, and being the go-to choice for customers seeking innovative and reliable water treatment solutions.

Product Innovation

Continuously researching and embracing new technologies and innovations by being up to date with trends happening in the market and innovative manufacturers. Staying ahead of the curve by offering cutting-edge products that address emerging needs and challenges in the market.

Clack Multi-Media

We distribute and stock a complete line of Filter Media including

Birm®

Removal of iron and manganese Birm is an efficient and economical method of removing dissolved iron and manganese from raw water supplies. Birm acts as an insoluble catalyst to enhance the reaction between dissolved oxygen and the iron compounds.

Filter-Ag®

Clack Filter-Ag® has many outstanding advantages over the more common granular filter medias used for suspended solids reduction. Its fractured edges and irregular surface provides a high surface area and complex flow path for efficient removal of suspended matter throughout the filter bed, typically reducing suspended solids down to the 20-40 micron range.

Clack

Multi-Media

Clack Mineral Tanks

We provide Mineral, Specialty, and Retention Tanks. Our tanks are made of high- density polyethylene (HDPE) plastic liner with composite. epoxy fiberglass filament winding over the liner. We have a wide range of sizes starting from 8 till 63 tank sizes.
